

# M&A AT A GLANCE

JUNE 2020 | ISSUE 99

## Key Takeaways

- After two tough months, May dealmaking points to tentative recovery, though still markedly lower than May 2019. Overall, M&A activity was choppy, yielding few consistent trends and some surprising statistics.
- Global activity continued to decline by deal number and total deal value albeit more modestly. While U.S. deal numbers fell 16%, total deal value increased 31% over April, though at \$24 billion is only 17% of last May's deal value. Similarly, crossborder activity remains low compared to a year ago.
- Somewhat surprisingly given reports of tightening credit markets, sponsor activity increased globally and in the U.S. by deal value and by number of deals, due to strong levels of minority-stake acquisitions. By contrast, strategic activity generally declined.
- While Computer and Electronics remains the most active sector for May and the last 12-months (LTM), both Mining and Retail entered the top-5 by dollar value in May, with huge increases over April. Distressed deals accounted for a large part of this month's rise in Retail dealmaking.
- In U.S. merger news: Tender offers constituted 67% of deals (compared to 18% LTM). There were no hostile deals (compared to 11% LTM). Further, we add new data on unaffected premiums and target advisory fees for these deals. Unaffected premiums hit 91% in May, compared to 36% LTM (likely reflecting merger consideration based on historical values as opposed to more recent prices). Total target advisory fees as a percentage of equity value was 2%, constituent with LTM levels.

## Endnotes

- 1 Each of Canada and India was the country of destination for 14 transactions in May 2020.
- 2 Industries categories are determined and named by Cortex.
- 3 Based on the highest target break fees and reverse break fees payable in a particular deal.
- 4 Financial and strategic categories are determined by Deal Point Data.
- 5 Three transactions in May 2020 had a target break fee.
- 6 One transaction in May 2020 had a reverse break fee.
- 7 Zero transactions in May 2020 involving a financial buyer had a reverse break fee.
- 8 One transaction in May 2020 involving a strategic buyer had a reverse break fee.
- 9 Financial and strategic categories are determined by Deal Point Data.
- 10 Zero transactions in May 2020 involved a financial buyer.
- 11 Three transactions in May 2020 involved a strategic buyer.
- 12 Zero transactions in May 2020 had a go-shop provision.
- 13 Due to rounding, percentages may not add up to 100%.
- 14 This data includes both announced transactions for which a definitive merger agreement was reached and filed and those for which a definitive merger agreement was never reached and filed (including withdrawn transactions).
- 15 Unaffected Premium % indicates the difference between the current price per share offered as consideration in the transaction and the "unaffected price," reflected as a percentage. The "unaffected price" is the target's closing stock price on the date that is one calendar day prior to the first public disclosure regarding a potential deal involving the target and on which the target's stock price was unaffected by the news of the deal.
- 16 Each of Australia, Italy and Taiwan was the country of origin for two transactions in May 2020.
- 17 Each of Canada and India was the country of destination for 14 transactions in May 2020.
- 18 Each of Germany and India was the country of destination for 85 transactions over the last 12 months.

The charts on p. 1–2 and 5–9 were compiled using Cortex, and are for the broader M&A market, including public and private transactions of any value. Deal volume by dollar value and average value of deals are calculated from the subset of deals that include a disclosed deal value. The charts on p. 3–4 were compiled using Deal Point Data, and include acquisitions seeking majority or higher control of U.S. targets valued at \$100 million or higher announced during the period indicated regardless of whether a definitive merger agreement was reached and filed or withdrawn. "Last 12 Months" data is for the period from June 2019 to May 2020 inclusive. Data obtained from Cortex and Deal Point Data has not been reviewed for accuracy by Paul, Weiss.
