M&A at a Glance

July 2026 | Issue 169

Key Takeaways

- Total deal values in the U.S. and globally fell in June compared to May, with global sponsor activity providing the only bright spot. Both strategic and sponsor deal counts were relatively flat in the U.S. and globally.
- Year over year (YOY), however, consistent with the trend toward megadeals, U.S. and global M&A deal values continued their increase, but deal counts fell modestly, except for U.S. sponsor M&A, which was flat by deal count.
- Inbound and outbound U.S. crossborder activity increased by both deal value and deal count compared to May, with the former seeing significant increases. The United Kingdom led outbound activity by both deal value and count in June and over the last 12 months (LTM). Canada led inbound activity by deal count in June and LTM, while the United Kingdom and Japan led by inbound deal value in June and LTM, respectively.
- Computers & Electronics was the leading U.S. industry by deal value and count in June and LTM.
- Of U.S. public deals announced in June:
  - The average reverse break fee was 5.1%, below the LTM average of 5.7%.
  - There were no deals with go-shops.
  - Hostile and unsolicited deals accounted for only 6% of deals, below the 14% LTM average.

The charts on pp. 3–4 were compiled using Deal Point Data and include acquisitions seeking majority or higher control of U.S. public targets valued at $100 million or higher announced during the period indicated and for which a definitive merger agreement was reached and filed (except with respect to data regarding premiums and hostile/unsolicited offers, which is for all announced deals).
